The image displays two screenshots of the Mendeley Reference Manager interface. The top screenshot shows a document viewer for the book "Ψηφιακές Λογοτεχνικές Σπουδές" (Digital Literary Studies) by Δημητρώλα, Εωνίτση, Τικτοπούλου Κ. (2015), pages 1-249. The main content area features a word cloud with terms like "NOTION", "TEXTS", "THEORY", "INTERPRETATION", "CONTEXT", "DIGITAL", "LITERATURE", "POSTMODERNISM", "HERMENEUTIC", "FIBRICAL", "CAPITAL", "GADAMER", "MAPPING", "THEORY", "DIETHELY", "MAPPING", "THEORY", "DIETHELY". The right sidebar shows the book's metadata and tags, including "ανάλυση κειμένου", "κωδικοποίηση κειμένου", "λογοτεχνία", "υπεκείμενο", "ψηφιακές ανθρωπιστικές επιστήμες", "ψηφιακές βιβλιοθήκες και αρχεία", and "ψηφιακές εκδόσεις".

The bottom screenshot shows a PDF viewer of the same document. The text on the page discusses the relationship between digital and analog media. A red box highlights a comment by user "Argyro" (5 minutes ago) that reads: "Στο άρθρο αυτό αναφέρονται και άλλοι πολλοί όροι, οι οποίοι και στελέχονται". Below the text, there are two video thumbnails: "The Island" and a video of a ship.

1 INTRODUCTION: THE OPPORTUNITY OF OPEN SCIENCE

"Open Science is changing every aspect of the scientific method to become more open, inclusive and interdisciplinary...Ensuring Europe is at the forefront of Open Science means promoting open access to scientific data and publications alongside the highest standards of research integrity."

Carlos Moedas, Commissioner for Research, Science and Innovation¹

1.1 The emergence of open science

Science today is in transition – from a relatively closed, disciplinary and profession-based system, toward an open and interdisciplinary structure where knowledge creation is more directly accessible to stakeholders across society. The European Commission gave its strong support to this transition in its 2016 report "Open Innovation, Open Science, Open to the World - A Vision for Europe" (EC, 2016).

Open science represents an innovation in the way research is performed: in how scientists collaborate and share knowledge with the wider world, and how scientific institutions are organized for greater societal impact. It has been driven by both digital technologies and social change. Technology provides us with new modes of communication, and generates huge volumes of data. Knowledge plays an increasing role in all walks of life. These changes have accelerated the globalization of research, while vastly increasing the public availability of scientific knowledge.(The Metric Tide: Review of Metrics in Research Assessment – UKRI, n.d.).

The remit of this Expert Group is to review the strengths, weaknesses, and future possibilities of next generation metrics to advance the open science agenda. For some, the ideal result might seem to be the development of a single metric through which to measure open science. We view this as impossible and undesirable. The best outcome – unrealised as yet – would be the development of a suite of metrics that offer a dynamic picture of the progress made toward the goals of open science.

Even this task represents a significant challenge, not least because the attempt to create such a suite of metrics must acknowledge the two-sided nature of the goals of open science. Metric scores typically indicate that some kind of connection has been made between a source and a recipient. Increasing such scores not only depends on 'supply side' efforts by scientific communities to provide better information to society. Just as important is the 'demand side' – the receptivity of society to scientific information and perspectives. Recent political events highlight the fact that this receptivity changes over time, as societal values change. Next generation metrics, then, must attend to both sides of this equation((PDF) Exploring the ResearchGate Score as an Academic Metric: Reflections and Implications for Practice., n.d.).

attend to both sides of this equation((PDF) Exploring the ResearchGate Score as an Academic Metric: Reflections and Implications for Practice., n.d.).

The European Commission sees the shift to an open science system as a source of competitive advantage for Europe. Open science covers the cycle of research from conceptualizing to analysing and publishing (see Figure 1). It embraces all types of scientific knowledge, from research data to journal articles to presentation slides, and all manner of stakeholders: researchers, funders, policymakers, citizens, enterprises, and publishers. Glänzel & Gorraiz, 2015.

The screenshot shows a Mendeley account profile page. On the left is a navigation menu with options: Account, Scopus Profile, Subscription, Notifications, Careers Settings, Billing, and Third-Party Apps. The main content area is titled 'Account' and includes a 'Profile photo' section with a circular photo of a woman and links for 'Change photo' and 'Remove photo'. Below this is the 'Personal details' section, which includes an email address field (afrantzi@uoa.gr), first name (Argyro), and last name (Frantzi). At the bottom, there are dropdown menus for 'Academic status' (set to Librarian) and 'Discipline' (set to Arts and Humanities).

The screenshot shows the Mendeley Reference Manager interface. On the left is a sidebar with navigation options like 'All References', 'Recently Added', and 'Collections'. The main area displays a list of references with columns for 'AUTHORS', 'YEAR', and 'TITLE'. One entry is highlighted: 'Ψηφιακές λογοτεχνικές σπουδές' by Δημητρώλια, Εσθίτη, Τικτοπούλου Κ (2015). On the right, a detailed view of this entry is shown, including its title, editors, city (Athens), publisher (Συνέσμιος Ελληνικών Ακαδημαϊκών Βιβλιοθηκών), and a list of tags such as 'λογοτεχνία', 'υπεκείμενο', and 'ψηφιακές ανθρωπιστικές επιστήμες'.

Mendeley Data

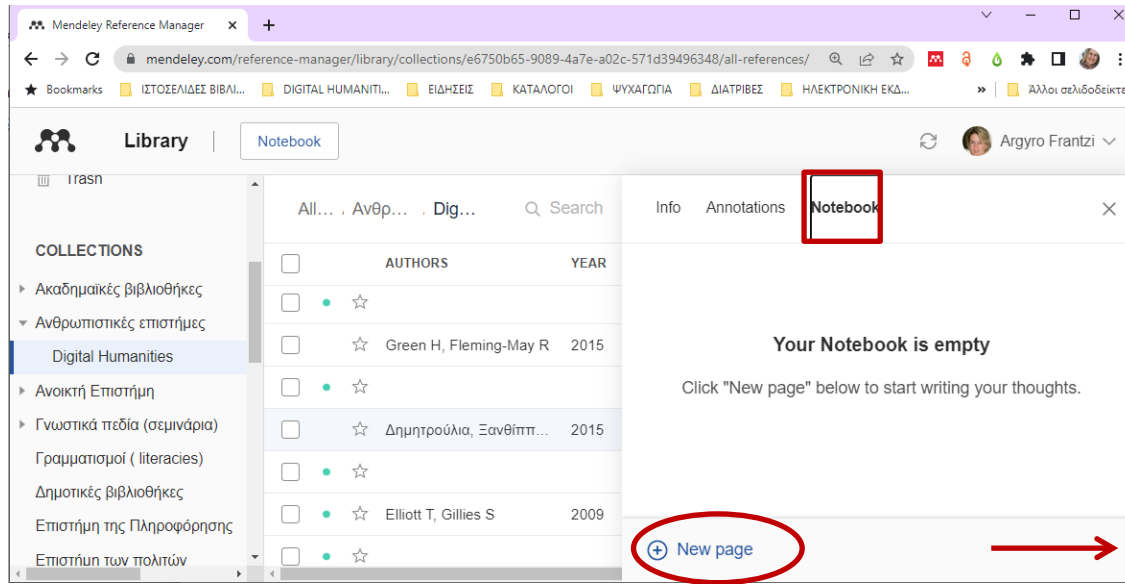

The screenshot displays the Mendeley Data website interface. At the top, the Mendeley logo and navigation links for 'Find Research Data' and 'My Data' are visible. A search bar contains the text 'digital humanities', with a 'Search' button and a note that 'Search results powered by Data Monitor'. Below the search bar, the page shows 'Filter Results' for '1223 results', sorted by 'Most relevant'.

On the left side, there are two filter sections: 'PUBLISHED DATE' with a timeline from 1970 to 2023, and 'DATA TYPES' with a list of categories such as Dataset (1212), Tabular Data (807), Document (401), Text (250), Software/Code (176), Other (83), Image (80), File Set (68), Geospatial Data (10), Slides (8), Video (8), Sequencing Data (7), and Audio (1).

The main content area shows a draft creation interface for a dataset titled 'test - BKT'. The draft is titled 'test - BKT' and is currently in a 'Draft' state, autosaved on 3 April 2023 at 14:26. The interface includes fields for 'Title *', 'Contributors *' (with 'Argyro Frantzi' listed and an 'Add contributor' button), and 'Description *' (with a placeholder 'Enter a description for this data.' and a '3000 characters left' indicator). On the right side, there are buttons for 'Preview', 'Share', 'Delete', and 'Publish'. The 'Share' and 'Publish' buttons are circled in red. Below these buttons, the 'Reserved DOI: 10.17632/zntwzxt6bk.1' is displayed, along with a 'Cite this dataset' section that provides the citation: 'Frantzi, Argyro (2023), "test - BKT", Mendeley Data, V1, doi: 10.17632/zntwzxt6bk.1'. A note indicates that the DOI is reserved but not active, and a 'Copy to clipboard' button is provided.

At the bottom of the draft interface, there is a section for 'My files' with buttons for 'New Folder', 'Move', and 'Delete'. A message states: 'There are currently no files in your dataset. If you publish, a metadata only dataset will be created.'

7.3. Συμπεράσματα

Είναι προφανές ότι όλα όσα αναφέρθηκαν παραπάνω αποτελούν επιμέρους μόνο πτυχές της ανάλυσης της λογοτεχνίας με ηλεκτρονική υποστήριξη. Σήμερα γίνονται, λόγω χάρη, οι πρώτες προσπάθειες αυτόματης μετάφρασης της ποίησης (Genzel, Uszkoreit & Och 2010) ή χρήσης των μαζικών δεδομένων στην ερμηνεία της (O'Haloran 2012). Η ψηφιακή συνθήκη παρέχει διαρκώς νέες δυνατότητες διεύρυνσης της οπτικής μας, στον βαθμό που δεν παρασυρόμαστε από το μέσο, αλλά το χρησιμοποιούμε για ενίσχυση των δυνατοτήτων κριτικής προσέγγισης στα κείμενα.

Τα οφέλη από την ηλεκτρονική ανάλυση κειμένου είναι προφανή. Ταχύτητα, ακρίβεια, δυνατότητα διενέργειας συγκρίσεων που διαφορετικά θα ήταν ανέφικτες – ειδικά στις περιπτώσεις ευρέων σωμάτων κειμένων, που το εύρος τους είναι απαγορευτικό για τη χειρωνακτική εξαγωγή αποτελεσμάτων. Είναι γεγονός δε ότι σε επίπεδο μακροανάλυσης, εξέτασης δηλαδή ενός έργου σε σχέση με την εποχή, τα ρεύματα, ή και τη διαχρονία, οι νέες τεχνολογίες είναι αναπικατάστατες. Ένα σώμα κειμένων των ελλήνων
